SC 430

ACCESSORIES

ENDURING APPEAL

The SC 430, as with everything Lexus, is defined by the pursuit of perfection. From its very inception the aim has been to combine wind-in-the-hair exhilaration with Lexus luxury and create, quite simply, the perfect cabriolet.

At the heart of the Lexus philosophy is a process of continual learning. Through this we seek to innovate, refine and extend the boundaries of automotive intelligence and sophistication. The effect is that the Lexus SC 430 ownership experience goes beyond meeting requirements and actually anticipates them.

Lexus accessories epitomise such an approach by recognising and responding to individuality. Each item has been designed by Lexus specifically for the SC 430, and then crafted to ensure seamless integration, unquestionable quality and absolute functionality. With Lexus accessories you can tailor your SC 430 to your lifestyle while confidently expressing your personal sense of taste and refinement.

COMMUNICATION

A. BLUETOOTH® COMPLEMENTARY KIT

The Lexus Bluetooth complementary kit improves the organisation and quality of telephony as you drive.

The system's ingenious interchangeable cable-less cradle sits neatly in the central armrest where it not only keeps your phone* secure but also recharges the battery. Adding to this is a discreet external antenna, which enhances reception while minimising the effects of electro-magnetic interference.

Importantly, you can take the cradle and your phone to use in another car fitted with the same system. Similarly, if someone else with a different phone wants to use your car, or if you change your phone, all you need do is change the cradle and not the whole kit.

B. HANDS-FREE TELEPHONE KIT

Clip your phone* into the cradle and you can start making and receiving calls straightaway. A microphone enhances pick-up and there's an external antenna for improved reception. The system integrates with your car's audio to relay the caller's voice through the front speakers while automatically muting the radio or CD.

* Contact your local Lexus Centre for details of phone compatibility.

SAFETY, PROTECTION AND COMFORT

A. PARKING AID SYSTEM (LPA400)

Even with a car of such exceptional visibility and manoeuvrability as the SC 430, you'll find the Lexus parking aid system an asset in busy car parks and when reversing close to low objects.

The system's four ultrasonic rear sensors activate when reverse gear is engaged. These prompt an in-cabin warning that becomes progressively louder the closer you get to an obstacle.

The sensors can be painted in your car's body colour for perfect visual integration.

SAFETY, PROTECTION AND COMFORT

A. CLEAN AIR FILTER

The clean air filter improves the quality of air entering your car's cabin by removing dust, pollen and fumes. When used in conjunction with the re-circulation function it enables you to enjoy the sensation of clean fresh air even in congested city streets.

B. VERTICAL CARGO NET

Clips neatly onto pre-fitted hooks in the boot to hold small items firmly in place. So simple, yet so practical.

C. CAR COVER

Custom designed for your SC 430. The car cover is quick and easy to fit and provides tough protection against the elements and accidental damage by passers-by.
