IS ACCESSORIES

BALANCED PURITY

The philosophy behind the new Lexus IS takes its lead from Japanese cultural values of balance, purity, intriguing elegance and, of course, hospitality. This is a car designed and built to help you relax and enjoy life. Its very essence contributes to a sense of well being and wealth of spirit.

The pursuit of perfection is fundamental to everything Lexus. It is a thought process that continually seeks to innovate, improve and unify. Driving the new IS fitted with your choice of Lexus accessories is the living embodiment of such thinking.

Genuine Lexus accessories extend that philosophy even further. The accessory range has been conceived by Lexus designers purely for Lexus cars and Lexus drivers. Integration is seamless, the quality is without question and the functionality realises both desire and fulfilment. Each item exalts individuality and invites a personal expression of style, comfort or practicality.

A

DESIGN

A. HOSHI 18" ALLOY WHEELS

The design of the Hoshi alloy wheels is perfectly attuned to the high performing IS. Custom made for Lexus: they are lightweight, strong and with a durable quality finish.

B. BARANSU 18" ALLOY WHEELS

A geometric multiple spoke design gives the Lexus Baransu alloy wheels a distinctly sporty appearance. Precision engineering ensures the ideal balance of low weight and high strength.

B

ENTERTAINMENT

IN-CAR ENTERTAINMENT

The in-car entertainment system personifies the Lexus design philosophy of intuitive engagement. Fingertip control enables rear seat passengers to play DVDs and CDs, connect to a games console and even review video recordings. Crucially, one passenger can enjoy a DVD while another plays a game or watches a video recording.

A. DVD PLAYER

Supports virtually all formats including DVD, VCD, DVCD, CD, CD-R, CD-RW and MP3. The memory function will restart a DVD exactly where it was stopped.

B. LCD SCREENS

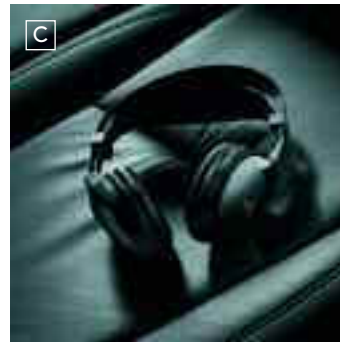

Wide format tiltable 6.5" LCD screens embedded in the front headrests provide high quality viewing.

C. INFRARED HEADPHONES

The wireless headphones operate via an infrared transmitter for enhanced reception. Individual volume controls maximise user convenience.

D. REMOTE CONTROL

A remote handset links all the components together for effortless control.

COMMUNICATION

A. HANDS-FREE TELEPHONE KIT

Clip your phone * into the cradle and you can start making and receiving calls straightaway. A microphone enhances pick-up and there's an external antenna for improved reception. The system integrates with your car's audio to relay the caller's voice through the front speakers while automatically muting the radio or CD.

B. BLUETOOTH® COMPLEMENTARY KIT

The system's interchangeable cable-less cradle sits neatly in the central armrest to keep your phone * secure while also recharging the battery. A discreet external antenna enhances reception and minimises interference.

Importantly, you can take the cradle and your phone to use in another car fitted with the same system. Similarly, if you change your phone, all you need do is change the cradle and not the whole kit.

C. BLUETOOTH® HANDS-FREE SYSTEM

Speaker-independent voice recognition enables you to command-dial up to 20 programmed numbers. Conveniently, calls transfer seamlessly between your phone * and the system when you get in or out of your car.

The system features a stylish backlit dashboard keypad control, connects to your audio for enhanced sound quality and has a directional microphone to maximise pick-up. It recognises five major European languages and individually pairs with up to four different Bluetooth phones.

* Contact your local Lexus Retailer for details of phone compatibility.

TRANSPORT AND STORAGE

A. BARRACUDA BICYCLE HOLDER

Safe transportation is assured because the Barracuda's moulded wrap-around retainer securely grips the wheels of your bicycle. A unique lockable anti-theft system protects both the holder and bicycle.

B. LUGGAGE BOX

The high capacity yet aerodynamic luggage box is ideal for touring holidays. Interior straps hold the contents neatly in place, central locking ensures security, and passenger side opening adds to the convenience.

D. ROOF RACK

The lockable Lexus roof rack combines with a wide range of specialised optional attachments to create added flexibility for exploring life's leisure potential. Its lightweight aluminium design is easy to install and use.

E. SKI HOLDERS

Having two sizes of ski holders to choose from gives you maximum flexibility for the winter sports season. The small holders will take four pairs of skis or two snowboards, and the large holders will take six pairs of skis or four snowboards. Both designs are height adjustable, lockable and made of lightweight aluminium.

F. SURFBOARD / MAST HOLDERS

The awkward shape of a surfboard or a windsurfboard and mast are easily and securely accommodated by the Lexus holders..

TRANSPORT AND STORAGE

A. HORIZONTAL CARGO NET

The last thing you want in a car as smooth and quiet as the IS is the distraction of luggage sliding in the boot. Be reassured, a horizontal cargo net will protect your serenity.

B. VERTICAL CARGO NET

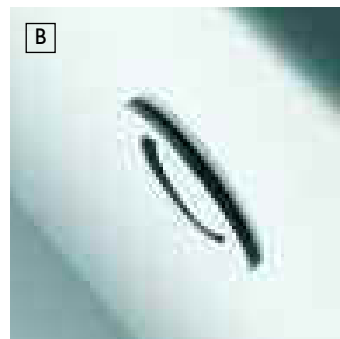

So simple in concept, yet so reassuring in practicality. The vertical cargo net clips neatly onto pre-fitted hooks to hold small items firmly in place.

C. DETACHABLE TOWING HITCH

With so much power under the IS bonnet you have plenty to spare for towing. A jet-ski or sports trailer perhaps? You can do it with the purpose designed Lexus detachable towing hitch. It gives you up to 1,500 kg towing capacity and comes complete with a dedicated wiring kit.

SAFETY AND PROTECTION

A & B. LEXUS PARKING AID SYSTEM LPA400 / LPA800

Even in a car as manoeuvrable as the IS, you'll find the Lexus parking aid system an asset in busy car parks and when reversing close to low objects.

You have a choice of the LPA400 system with four rear sensors or the LPA800 with four rear and four front sensors. When either system is engaged, the sensors link to an interior warning that becomes progressively louder the closer your vehicle gets to an obstacle.

C. FOOT REST

That final detail for rear seat passenger comfort. The adjustable height and relaxing soft velour covering make the Lexus foot rest an ideal accompaniment for any journey.

D. BOOT LINER

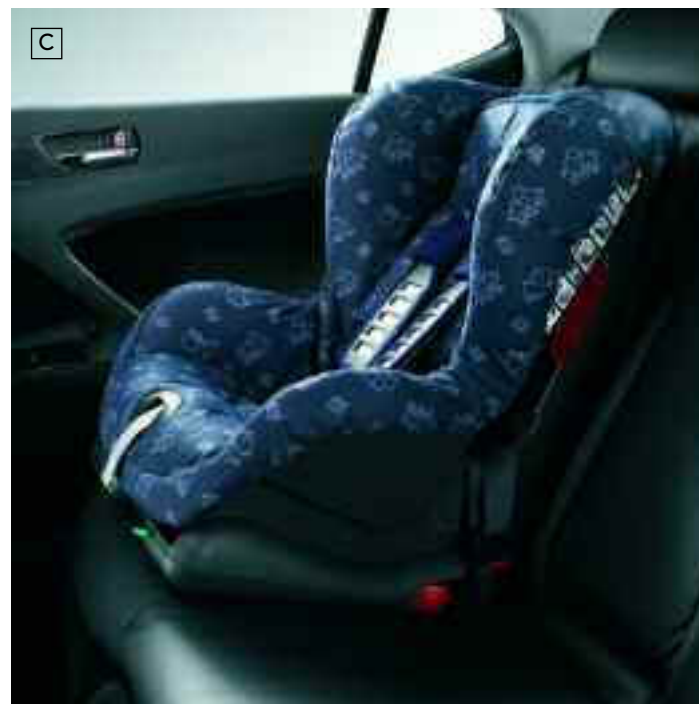

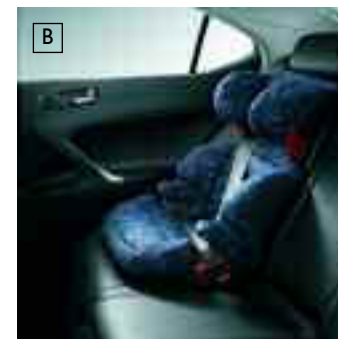

The waterproof easy to clean boot liner offers assured protection for your boot carpet. Outdoor clothing, riding boots, even a wet-suit can be accommodated without risk. The special anti-slip surface pattern creates a gentle friction to help stop luggage moving around.

SAFETY AND PROTECTION

A. RUBBER FLOOR MATS

For the ultimate protection against the very worst conditions that you or your passengers dare to tread inside. The set includes two front and two rear mats, with each tailored to the floor contours for a perfect non-slip fit.

CHILD RESTRAINT SEATS

A. BABYSAFE

Assured comfort and impact protection for babies aged up to around 15 months (to 13 kg). An adjustable canopy guards against the elements.

B. CHILDREN

Ensures correct seatbelt positioning and optimum impact protection for children of between three and 12 years (approximately 15 to 36 kg).

C. DUO PLUS (ISOFIX)

Especially for children aged between eight months and four years (approximately 9 to 18 kg). It locks into the rear seat ISOFIX bars with a simple push-click operation to anchor onto the car body and also attaches with a top tether for all-round stability. Ergonomic cushioning and an integral seat belt ensure comfort and security.
